Cavite State University (Bacoor Campus)

Molino VI, Bacoor, Cavite

Bachelor of Science in Computer Science

2022 – Present

Projects

Cavite State University Website: <https://cvsu111.netlify.app/>

- This project is a School Website for our school.
- We use HTML and CSS to build this project.

Zyntax: <https://pichapie234.github.io/Zyntaxx/>

- This is an IT company that we developed during our freshman year
- We use HTML and CSS to build this project

Case Report System

- Developed by myself using HTML and CSS for frontend and for backend I use PHP.
- It has a CRUD Operation to manage the case reports.

Zen Store

- This is for grocery store, for their inventory. This is an Inventory Management System
- I am the Frontend in this Project. We use Java and MySQL to build this.

CVSU Enrollment System

- This project is an Online Enrollment System. We use React and NodeJs.
- I am the QA Tester in this project and I use Jest.

Finding NeedMo

- This is an online repository for teachers and student. They can upload and see the topics here. We use React and NodeJs for this project
- I am the QA Tester in this project and I use Jest for testing.

Skills:

HTML, CSS, Java, JavaScript, Python, and React

Testing: Jest
